Is Your TV Smart? Is it Smart Enough?

If your TV is connected to the internet, you can stream! Some TVs have apps and content built in, but to unlock the most content, you may want to pick up a streaming device such as an Amazon Firestick or Roku Streaming Stick. Plug the device into one of the HDMI ports on your TV and unlock more content than ever before! Still not sure? Ask us or you can find several step by step videos on YouTube.

Why Would I Stream if I Already Have Santel Video?

The major reason people who stream video love it is the ability to watch WHAT EVER they want, WHEN EVER they want and WHERE EVER they are. Services like Netflix, Hulu and Amazon Prime have a vast library of shows that you know and love, as well as buzzworthy original programs that are gaining critical acclaim. Many people stream video in addition to their regular TV service.

What Can I Stream for FREE?

Here in South Dakota, we have Locast available to all customers for FREE (like public television, donations are encouraged). You can watch all the local broadcast stations ABC (KSFY), CBS (KELO), FOX (KTTW), NBC (KDLT) via the Locast app on your phone or on your TV. As you probably know, the cost of TV is steadily increasing, and the broadcast stations make up a large portion of your bill. In cases of a retransmission consent blackout, this is an alternative to succumbing to broadcasters price increase demands. For more information, go to locast.org.

Want another way to watch those Minnesota Vikings games? Download the NFL app on your phone or tablet and your local NFL games (VIKINGS) are available for free, as well as primetime games (Sunday, Monday, Thursday night games).

There are quite a few other apps that are free and your smart TV or streaming stick may already be loaded with these apps.
